

Understanding Location Data

Based in San Francisco with an additional location in Lima, Peru, AmigoCloud was founded by a team of GIS experts in 2013 to empower companies and individuals to collect, manage, visualize, and analyze location data to better understand their business and reveal and hidden patterns to reduce costs and increase operational efficiency.

AmigoCloud has developed the first Collaborative Mapping Platform, offering two products, amigoCollect and amigoPlatform.

amigoCollect is a mobile application, built for Android and iOS devices, that helps your field crew collect data, whether online or offline, and collaborate with as many people as your team needs.

With a streamlined and quick workflow, you can collect, storage, transform, enrich, visualize, and analyze data as well as easily create, embed, and publish meaningful maps. We reduce, and in some cases completely eliminate, mapping workflows that would normally take several days or weeks.

amigocloud

Understanding Location Data

Our software is designed to require no GIS training or any other kind of specialized hardware.

amigoPlatform enables companies to build a custom mapping solution, analyze big location data and real-time data, even a petabyte scale, and add location intelligence to your own software.

A powerful enterprise-ready platform to manage from remote sensing data and satellite imagery to Internet of Things data coming from sensors.
