

amigacloud

Team

Ragi Burhum

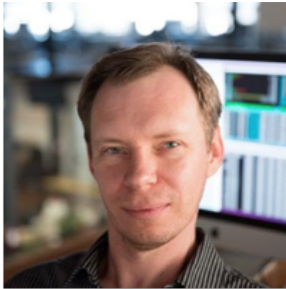

Co-Founder / CEO

15+ years of experience in geospatial systems working at companies such as ESRI and Microsoft. Ragi began his career at ESRI, creating, designing, and maintaining the current market leading desktop Geographic Information System (GIS) in the world. A serial entrepreneur (co-founded/CTO ModeWalk – acquired by Moda Operandi) and founder of the GeoMeetup (the largest developer-centric geospatial Meetup in the world), he is also heavily involved in Open Source GIS Software/Libraries used by virtually every company that does any kind of mapping worldwide.

Victor Chernetsky

Co-Founder / VP of Mobile

25+ years of experience working on computer graphics, embedded devices and GIS systems. While at Delphi, he worked on embedded automotive navigation systems for General Motors. At DPD, he worked on 3D visualization of high-resolution GIS data. Later, at Pioneer Research, he developed high-precision inertia positioning systems that leveraged gyros, accelerometers and other next-generation sensors. He has published several applications in different App Stores.

Daniel Caldwell

Director of GIS

Worked at ESRI for 12 years, where he began his collaboration with Ragi. Daniel used his Top Secret US Security Clearance for several of ESRI's DoD and NGA integration projects. He has worked with many of ESRI's high-profile enterprise customers like UKHO, National Geographic, US Forest Service, National Geographic, etc. He specialized in Geographic Information Systems, particularly interested in applications working with spatial data that help solve real world problems.
